

afSOCIETA' ONSORTILE

A RESPONSABILITA' LIMITATA

AFS Limited Liability Consortium was generated by the union of experiences of the founding Companies which, putting to common factor their specific decennial expertise in the field of services to both private and public enterprises, created a new Consortium which placed Customers and their needs at the centre of the "core business" with the strategic goal to optimize quality, in order to offer integrated Global Services.

Our strength is given by the continuous trust that our customers renew us year after year. The proof of this trust is the constant growth of our turnover which has increased by 20-30% every year.

Over the years we have experienced strong growth also in terms of hired Employees.

To date, we count over 3.500 Operators located all over Italy. Our teams are constantly trained, they do maintain individual commitment and responsibility, have clear professional goals to reach and are therefore highly qualified.

We provide professional services as follows:

- Industrial cleaning services;
- Ordinary and extra-ordinary maintenance services;
- Warehouse logistic services;
- National and international transportation.
- Intermediation and waste management

IN & OUT WAREHOUSE LOGISTIC SERVICES

Organization and management of logistic activities, delivered even directly at the third parties' implants, also taking over existing structures and using resources already in place within the company, and supported by advanced operating procedures matching high quality standards maintenance related to:

- Sorting
- Warehousing
- Porterage
- Picking (with Voice Picking equipment)
- Man Power
- Storage

STAFF RECRUITMENT

The Staff recruitment is carried out according to impartiality and fairness, based on equality, regardless of race, sex, religion, nationality, language and social status.

The confidentiality of personal data is guaranteed and initiatives are taken to adapt the methods of provision of service to Customers with special needs.

We ensure the development and adaptation of management and relational skills together with technical skills and operational aspects of Human Resources in accordance with the requirements of the organizational roles and Quality, Safety and Environment Policy.

Each worker receives all necessary training and information via training courses, seminars or directly at the workplace, focused on specific issues and risks associated to services, to methods of providing the working service and to the correct use of products and equipment provided by the company.

We also train and inform our Supervisors on the contents of the general contract terms and conditions, and internal procedures provided by the Quality Management System (QMS), by the Management System Workplace Safety (SGSL) and the Environmental Management System (EMS). Any programs, with specific contents, must be added to the basic program from time to time depending on the activities to be carried out.

AFS is determined to follow a policy of Human Resources constant training, thanks to the commitment of qualified Supervisors, in order to match and achieve the highest quality standards.

INDUSTRIAL CLEANING (PEST CONTROL AND SANITATION)

These services are carried out with modern and State-of-the-Art equipment. A close and strong cooperation with the first class Chemical Companies allows the Consortium to provide accurate services using cleaning products coherent with the strict Rules and Regulations related to Quality Cleaning. With a specific focus on environmental issues, we use and offer Eco-Label Cleaning products for:

- Civil and industrial Cleaning
- Deep Industrial Cleaning
- Deratization Services
- Sanitization and sanitation Services using latest technology steam machinery, which allow us to release antibacterial certification
- More than 200 washer-dryer machines both with on board driver, and automatically driven

ORDINARY AND EXTRAORDINARY MAINTENANCE SERVICES

These services are provided by our Staff in uniform, in 24/7/365 roster, and are delivered to public, private and commercial Customers.

- Signs Installation
- Floor taping
- Work stations and desks assembly
- Installation of IT equipment
- Shelves assembly
- Positioning and connection of monitors and cable management
- Suspending frames
- Installation of electrical systems
- Installation of alarm systems, cameras and video surveillance security systems
- Maintenance of electric gates
- Other maintenance activities

NATIONAL AND INTERNATIONAL TRANSPORTATION SERVICES

AFS SCARL manages transportation services for third parties and serves important Clients who operate nationally and internationally. Our group offers cutting-edge services, related to national and international transportation, traceability of goods, logistics, and distribution.

We rely on several years of experience, gained in the field of transportation and transport logistics, we offer an excellent quality service and high efficiency by paying attention to respect for the environment; these characteristics describe best our reality.

Our company can count on a large fleet of vehicles, accurately and deeply controlled. We are thus able to guarantee adequate transportation services, relating to different needs and environmental friendly.

We deal with national and international transportation Companies. Given the possession of a large fleet we can cover any destination, our means are available and operational throughout the year.

Our work is done on a 24 hours roster since we have an operational Dept. which takes

care of the transportation activity on both national and international territory.

Our employees are experts in this field, and we do care in performing periodically updated specific training courses.

OUR OVERALL SERVICES:

- INDUSTRIAL CLEANING
- ORDINARY AND EXTRA-ORDINARY MAINTENANCE
- WAREHOUSE LOGISTICS
- MANAGEMENT OF OUT-SOURCING WAREHOUSES IN 3 PL
- NATIONAL AND INTERNATIONAL TRANSPORTATION
- INTERMEDIATION AND WASTE MANAGEMENT

• INTERMEDIATION AND WASTE MANAGEMENT

AFS SCARL is registered with the register of environmental managers for the activity of intermediation and trade of non-hazardous and/or hazardous waste category 8/class F.

We offer a waste processing and disposal management service scrupulously divided by type. Our operators are specialised in the control of waste processing, management and cleaning of the area surrounding the collection bins, also taking care of the bureaucratic and administrative management of the compilation of loading and unloading registers, and the filing of forms for the entire period of activity.

High reliability is guaranteed in every step of the waste management process, from the customer's premises to disposal and recovery, with constant support on regulatory compliance.

We evaluate with the customer the best solution in terms of sorting, recovery and/or disposal depending on the type of waste, always pursuing the objective of reducing the amount of non-recoverable waste and maximising the recycling of waste in order to return it to the production cycle. The recovery and disposal of all waste takes place at the plants of our selected partners. The plants are designed to carry out substantial recovery preparation activities for the waste collected through dedicated sorting lines for accurate sorting of the materials in order to significantly reduce the environmental impact of the waste, and amplify the possibilities of recycling.

We routinely handle this type of service, having already worked for major clients in the country who have realised impressive structures.
